The Granada Kingdom, Grubenta's scoop on the Innova catwalk of Fruit Attraction 2017

The horticultural company GRUVENTA will present at the Innova Pasarela **of** Fruit Attraction 2017 **the grenade Kingdom, after its agreement with the company** CALIFRESH**, for which it will exclusively market the fruit.**

As explained by GRUVENTA executives, Fermín Sánchez Navarro, "Granada Kingdom has a maturity date that runs from mid-October to the end of November. The internal quality of the fruit of this fruit presents a good taste, slightly acid, with dark red arils and pinion of average hardness ".

In addition, sources GRUVENTA has also noted that "its size is large, between 500 and 600 g medium weight, as well as has a fantastic external color, between dark red and garnet. The characteristics of the tree of this fruit has a medium-high growth vigor with rapid entry into production".

With respect to its productivity, GRUVENTA notes that "it is high, more than 35,000 kg / ha in full production under normal conditions. *The key points that differentiate it from other existing varieties are: within the semi-acidic varieties, Kingdom has the lowest acidity; low incidence of sunning, fungal problems and fruit cracking, coupled with the fact that this selection is characterized by its premium size and its attractive external and internal appearance".*
