A tire to "lighten the load" the farmer

Mitas**, member of the** Trelleborg Group**, has worldwide introduced its new tire 20.5R25 EMR-01, designed specifically for loaders used in agriculture.** ***Its design traction tread, similar to that of a tractor tire*****, gives an excellent self-cleaning and excellent traction. In addition,** ***its 25" covers the need for farmers to switch to a larger agricultural use of loader tire.***

As highlighted Jaroslav Musil, Product Manager Mitas tire construction, "today, loaders are used not only for construction but increasingly in agriculture. The answer has Mitas for this is the EMR-01, with its unique design traction tread. "

Mainly suitable for operations on wet, muddy and soft where good traction is required, the 20.5R25 Mitas EMR-01 is superior to traditional industrial designs in categories L-2 and L-3 under these conditions

This innovative tire is also suitable for light industrial use.

As has also highlighted Musil, "usually loaders mounted tires 25" designs industrial tread band. When farmers want to use the loader for agricultural work, they need to change tire 26 "to mount tires with the traditional design of traction. With EMR-01 Mitas 20.5R25, changing agricultural industrial tires is much easier, since farmers can mount tires on rims source 25 "loaders".

About Mitas

Mitas, part of Trelleborg Group, is one of the leading producers of agricultural tires in Europe. Mitas manufactures and sells tires under the Mitas and Cultor brands. In addition, Mitas produces and distributes a wide range of motorcycle tires and the Mitas brand. Since April 2015 Mitas manufactures bicycle tires under the same brand. This company has three factories in Czech Republic, one in Serbia and one in U.S.A., and maintains a worldwide network of distribution and sales.
