Increased productivity and comfort in compact tractors John Deere 2R Series

John Deere **has introduced its new line of compact tractors John Deere Series 2R, aimed at customers who wish to increase their productivity without losing comfort. The 2026R and 2036R models offer a totally new design, with numerous innovations and powers of 26 and 36CV, respectively.**

Both models are designed for operator comfort and ease of use and equipped with ergonomic controls, adjustable steering column and cruise control. *The 2036R also includes a Premium air suspension seat. Both tractors are offered in versions with open and platform cab, both ensure excellent peripheral visibility.*

> The 2026R is the smallest of these models, a compact design to work in very confined spaces. The 2036R has more battle and track width, combined with a higher weight increases stability

The design of the new models of the 2R series is conceived to meet the need of customers of efficient, durable and easy to use solutions, enabling them to do more work in less time and with less effort, notes Jared Lowe, marketing director John Deere compact tractors. "When we designed the new models of the Series 2R, says, *we focus on increasing the stability, comfort and ease of coupling of machine tools to achieve that solution*."
