New on fertilization, planting and spraying GIL

The latest edition of FIMA, Julio Gil Agueda and Children has participated one more year in its traditional stand. In this issue there have been important developments: the fertilizer ELECTRA, AIRSEM XL seeder and sprayer Combined ABANTOS.

At the stand of FIMA GIL in 2016, visitors have seen ranges planting, soil and spraying work, plus a new fertilizer spreader model ELECTRA, of 3,000 liters.

In planting there have been three all-new models in FIMA, the AIRSEM-XL COMBO 6 meters working width and a capacity for 3,550 liter seed of 2,250 liters of fertilizer. Another team is the AIRSEM-XL-D, with 6 meters seeding disks and a hopper capacity of 6000 liters spectacular machine for large returns on large farms.

It has also exposed the AIRSEM 6738-D, the team largest ever built in GIL with almost 7 meters wide direct seeding discs. Finally you will see the familiar and classic models AIRSEM SUSPENDED of 5 and 6 meters, with floating train planting and front preparer.
In floor work tools they have been presented large as the versatile CHM-100 3F 25 arms, a lightweight trainer model CHL-4F-41 with drag and front roller and a plow of bribery 10 plough tools, model ACHL-10- B.

In spraying, first in FIMA they have shown new ABANTOS, TELENO and ANETO models, washed and suspended with different widths of bars in aluminum equipment.
