Revolutionary technology in the new Mitas CHO tires

Mitas**, a member of the** Trelleborg Group**, is expanding its range of** Cyclic Harvesting Operation (CHO) **tires and introduced two new measures in December, incorporating unique technologies to protect the soil.**

The Mitas CHO tires are designed for harvesters, grain cars and similar implements.

> The unique construction of the CHO Mitas uses hexagonal core technology, steel belts and flexible flanks, and allows the floor to be protected for large loads at a lower pressure

Mitas CHO tires are favorites among the leading producers of agricultural machinery.

For Pavel Kott, Product Manager for Mita agricultural tires, "cyclical loading and emptying of corn tanks, for example, can vary significantly, even more than twice in some cases. At high inflation pressures, this leads without compromise to soil compaction. *The solution is a Mitas CHO tire because it is capable of carrying more load with less tire pressure".*

> With the expansion of its range of CHO tires, Mitas currently offers nine measures in markets around the world

With CHO, Mitas has designed a range of extremely powerful tires for large harvesters. CHO is capable of higher maximum loads than standard tires and at the same time, the tire allows higher performance thanks to smooth handling in the field offering more comfort on the road.

> The greater footprint of Mitas CHO helps to distribute loads equally, which has a positive influence on soil compaction

Mitas CHO meets all legal vehicle width requirements and can be mounted on standard tires.

Measures of CHO Mitas currently available:

900 / 60R42 CHO 183D / 186A8 SFT (new)
900 / 60R38 CHO 181D / 184A8 SFT (new)
900 / 60R38 CHO 178D / 181A8 SFT
900 / 60R32 CHO 176A8 / 173B SFT
900 / 70R32 CHO 182A8 / 179B SFT
800 / 70R32 CHO 175A8 / 175B SFT
800 / 70R38 CHO 178D / 181A8 SFT
680 / 80R42 CHO 180D / 183A8 SFT
680 / 85R32 CHO 178A8 / 175B AC 70G

Since early 2017:

680 / 80R38 CHO 179D / 182A8 SFT
800 / 70R42 CHO 182D / 185A8 SFT
800 / 70R38 CHO 181D / 184A8 SFT

About Mitas

Mitas is one of the leading European manufacturers of tires for agricultural machinery, construction vehicles, motorcycles, bicycles and other specialized segments. Mitas manufactures and markets tires under the Mitas and Cultor brands. Mitas has factories in Czech Republic, Serbia, USA, and a global distribution and sales network.
