The most innovative of Agrotechnology Group at Fruit Attraction

In a privileged place in the latest edition of the International Fair of Fruit and Vegetables in Madrid, the Agrotechnology Group, he presented the trials of Actium in the 2014-2015 season and Politec product. The company has participated in Fruit Attraction again, but this time with a stand of 50 meters.

The Agrotechnology Group has participated in the Innova Forum in order to present the trials in the 2014-2015 campaign with your product Actium in different horticultural crops and pome fruit and stone.
Actium is an enhancer of the natural color of the fruit, which is non-hormonal and physiological action on the ground, thus not affecting the post-harvest life of the fruit, resulting in better marketing.

Also, Agrotechnology Group has taken part in the Pasarela Innova presenting Politec, this ecological and natural product acts as a powerful attractant natural pollinators, improving fruit set percentage, earliness and yield of treated crops.
