Todolivo undertakes the works of its new headquarters, in the old factory of Pan Arenas

The company from Cordoba Todolivo will locate its new facilities in the old Pan Arenas factory, which has been acquired for this purpose. With its new headquarters, Todolivo seeks to provide a more efficient service to its customers, while transmitting a more avant-garde image, in accordance with its corporate identity. The company, expert in olive cultivation in hedge, plans to inaugurate the new facilities in early 2019.

The works of the future headquarters of Todolivo in the lands of Pan Arenas, have begun in early September, with the demolition of the old ship. In September 2016, the company acquired a building of more than 5,100 square meters, *with the aim of centralizing part of the services it provides to its customers at headquarters, transmitting its avant-garde identity in terms of its continuous commitment to innovation and to be located geographically in a strategic place*, since it will be possible to accede to the future facilities directly from the A-4 - also denominated Autovía del Sur or Highway of Andalusia -, being this the main communication route between the center and the south of the Peninsula Iberian

> With the construction of the new facilities, Todolivo intends that its clients gain in fluidity in the displacement to its facilities

To facilitate this, the company has arranged 84 parking spaces, 29 of which will be built on surface outside the building, and the rest, 55, in the basement. From here, the customer can directly access the interior of the premises, where the distribution of the different spaces will facilitate their mobility.

On the other hand, the Cordoba company intends to make the client's communication more comfortable with the different departments that are part of the company: Management, Technical, Plantation, Irrigation, Collection, Olive milling and oil sales, Logistics and Sale of phytosanitary products and payment and Administration. Todolivo improves synergies and the attention it provides to its customers.

The new facilities will have not only the different departments with which the company already has, *but also the collection and planting machinery will be transferred to them, which will have a workshop to service their repairs and perform maintenance corresponding.* The rest of Todolivo ships will continue to be used by the company in the different geographical areas where they are currently located, including the nursery, which will continue in the municipality of Pedro Abad.

With this change, in addition, this firm Cordobesa will project a modern and efficient image of its facilities by betting on an innovative and avant-garde design.

> Todolivo's commitment to renewable energies shows that all the consumption necessary for the operation of the new headquarters will come from solar energy

Interpretation Center of the Olivar in Seto

> One of the most striking places will be the *Interpretation Center of the Olivar in Seto* where the concept of this culture system will be transmitted, what this is and how it is the process that is followed until extracting extra virgin oils of high quality

Also will be announced the characteristics of the different varieties with which Todolivo works and its oils, that can be tasted in a tasting room. "What this is about is that the farmer who visits this Interpretation Center comes out with a global vision of the entire production cycle of Olivar in Seto, from its planting to the extraction of extra virgin oil," point out from the company Cordobesa.
